# About Me

I am a CG Artist / 3D Visualizer living in Hong Kong, with more than 18 years of experience in the industry.

I pursued my higher studies in Electronic & Communication Engineering at The Open University of Sri Lanka. During this time, I also studied 3D graphics and animation. Some of my works have been featured in several magazines and have received a few awards within the industry.

My artistic skills are mostly self-taught, and I have experience with most current aspects of 3D asset creation. I am always looking for self-improvement and am willing to experiment with new possibilities of visual expression through any process of visual communication, from traditional techniques to digital ones. I seek real and tough challenges that can bring out the best in me for those I work for, pushing my limits over and over again.
